## Naturalized “Re-Membered” Water

*Imagine the perfect drinking water found in nature, tumbling down rocky mountain streams and flowing through pristine subterranean aquifers...*

**Naturalized “Re-Membered” Water** undergoes a series of purifying and revitalizing treatments that return water to its ideal life-affirming natural state. **“A drink to your health.”**

### ULTRA PURIFICATION

The process begins with high quality four stage **Reverse Osmosis (RO) purification**.

**Stage 1.** A sediment filter removes physical dirt and debris from the city water supply.

**Stage 2.** A solid pre-carbon block filter removes chlorine and limited amounts of other chemicals.

**Stage 3.** A thin film membrane removes everything left by the pre-filters to the high 90% level, such as lead, arsenic, mercury, fluoride and numerous other toxins found in city tap water.

At this point the water is automatically stored in a **pressurized** tank prior to the following stages. When water is called for at the filling spigot it returns to the system and passes through another (**Stage 4.**) solid post-carbon block.

The purified water now travels through a dual cartridge **de-ionizing process** removing any remaining trace of impurities, rendering it **ultra-purified**, relative to the state of distilled water.

### RE-MINERALIZATION, IONIZATION & PH BALANCE

The ultra-purified water is now re-mineralized, flowing through a layered bed of **specialized mineral compositions**:

**Magnetic Ceramic;** A natural iron-rich volcanic rock prompts the release of negative ions.

**Above Sea Coral;** Rich in electrolytes and other trace minerals.

**Bakuhanseki;** A natural stone that helps to balance pH levels.

**Torumarin;** A natural stone that ionizes water molecules by decreasing their size.

A mixture of **calcium** carbonate and **magnesium** oxide de-acidifies and **alkalizes** water. This combination of elements also generates significant levels of **hydrogen** and **oxygen**.

### MAGNETIC STRUCTURE

In the final stage, water flows through a powerful **Magneto Hydro-Dynamic (MHD) South Pole magnetic field** causing a structuring effect that suspends minerals in the water molecule to produce a light, refreshing and **super hydrating** form of water sometimes known as **“wet water.”**

**The Ultra System...ultimate full spectrum quality drinking water...at your finger tips.**
